

October 7, 2022

REGIONAL TRANSMISSION INITIATIVE TECHNICAL MEETING

AGENDA

This Scoping Meeting is being convened by the states of Connecticut, Maine, Massachusetts, New Hampshire, and Rhode Island (Participating States)¹ to provide an overview of the Notice of [Request for Information](#) (RFI) issued by the Participating States on September 1, 2022.

10:00	Welcome and Opening Remarks
10:20	Overview of the Modular Offshore Wind Implementation Plan
10:30	U.S. Department of Energy – Bipartisan Infrastructure Law Funding Opportunities
11:00 – 12:00	Opportunity for Stakeholder Presentations
12:00 – 12:30	Lunch
12:30 – 1:50	Opportunity for Stakeholder Presentations
1:50 – 2:00	Closing Remarks

¹ Given Vermont's vertically integrated structure and the lack of any shoreline to act as a potential point of interconnection for offshore wind, which is a substantial, though not sole, focus of this RFI, Vermont will not act as a Participating State. However, Vermont is generally supportive of a regionally organized effort to gather information that will aid each state's planning activities and potentially facilitate federal funding opportunities for transmission upgrades and will remain a close observer of this Request for Information and may participate in subsequent discussions regarding its content and/or next steps. Vermont also shares the objectives of reliably greening New England's energy supply and grid while ensuring that ratepayer costs related to such efforts are minimized.
